Great Basin Priority Summary - Based on Most Recent 209's  
7/29/21

[illegible]

## Evening Brief

Date: July 29th, 2021

---

### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

|             |      |  |
|-------------|------|--|
| Great Basin | PL 3 | Moderate Initial Attack Activity   |
| National    | PL 5 | New Fires and Acres: 33 fires for 127.55 acres / 1,099 acres Large Fire Growth |

---

### Weather Summary:

**... Mix of Wet/Dry Thunderstorms for Idaho Friday with Increasing Wet Thunderstorms Spreading north Sat/Sun ...**

**... Risk of Flash Flooding/Debris Flows with Heavier Rains Later in the Week into the Weekend...**

Showers and thunderstorms will develop across much of the area again Friday, with greater lightning coverage spreading north into Idaho/Wyoming. Storms will be wettest across the southern half of the Great Basin with the potential for a mix of wet and dry storms across the northern part of the area. Wetting rains will likely occur over Southern Idaho, Wyoming, and Western Nevada, but will be spottier. Gusty outflow winds will again occur near storms.

Wetter showers and thunderstorms are expected area wide through Sunday as monsoonal moisture continues to stream northward into the Great Basin. Heavy precipitation amounts are possible over central and eastern portions of the Great Basin for the weekend and also over parts of Idaho and Wyoming.

Localized flooding and debris flows are possible in areas where heavy rain falls over recent burn scars.

Drier air pushes into western areas of the Great Basin into next week with less overall lightning and moisture in many areas.

---

### Fuels/Fire Potential:

**.... Fuels and Fire Behavior Advisory in effect for Idaho, and Northern Portions of Both Utah and Nevada and Along the Sierra Front ...**

Large fire potential remains elevated over Western Idaho, into Northwest Nevada where conditions have been quite dry recently and moisture with thunderstorms initially will be limited this week. Additional moisture may be more widespread in all areas through the weekend, which is expected to lower fire danger in some areas for several days. However, drier conditions will return to northern and western areas Sunday into next week.

Fuels in the southern half of the Great Basin have moistened significantly in most areas, with continued moistening in the coming days...and minimal large fire potential for the time being.

## Resources:

### Aviation within the Great Basin

- 0 VLAT, 1 LATs, 2 CL-415
- 24 SEATs, 0 FB, 9 AA, 1 ASM, 0 LP
- 10 Type 1 Helicopters / 9 Comm.
- 7 Type 2 Helicopters / 6 Comm.
- 19 Type 3 Helicopters / 11 Comm.

### Crews Committed within the Great Basin

- 13 IHCs / 0 Available / 1 R&R
- 18 Type 2IA / 0 Available / 0 R&R
